Introduction

- The Birmingham Airport Authority (“BAA”) is requesting proposals (RFP) for cleaning out four (4) oil separators
- The goal of this procurement effort is to enter into a contract with the best-valued Contractor to clean out four (4) oil water separators as described in this RFP.

Scope of Work –Summary of Project

- Perform a full assessment, cleaning and lawful disposal of solids and liquids from four oil/water separators (2 spill-control type, 2 conventional).
- Provide full documentation, photographs, waste manifests, and a written step-by-step procedure for each separator cleaned.
- All work will be performed in accordance with Alabama Department of Environmental Management (ADEM) regulations for used oil, hazardous/solid waste, and manifest requirement.
- Make sure each oil/water separator is retuned back to normal operation.

Scope of Work- Onsite Assessment

- Visual inspection of each separator: type, access, inlet/outlet piping, sample ports, filter pack configuration, sludge/float depth, trap/flowmeter, and nearby drainage points.
- Collect field observations and representative liquid/solid grab samples (see “Waste classification & sampling” below).
- Photograph each unit and note GPS / asset ID.
- Produce a written assessment that categorizes each separator condition as High / Moderate / Low priority for cleaning and repairs.

Scope of Work- Preparation for Cleaning

- Lay out containment (secondary containment berms, drip pans, absorbents).
- Provide traffic control and signage if units are adjacent to roadways or operations.
- Establish decontamination and washdown collection points.
- Lockout/tagout and confined space procedures as required.

Scope of Work- Cleaning & Solids Removal (Per Separator)

- Isolate the separator and remove free oils and liquids by vacuum truck or appropriate pump.
- Remove accumulated float (oil) and settled solids/sludge using vac services and manual scraping if needed.
- Remove and bag filter packs/media for characterization and replacement where required.
- Conduct low-pressure washdown only after solids & free oil are removed; collect wash water to contained sums for treatment or transport.
- If needed, conduct an internal inspection and document internal structures, baffles and invert elevations.

Scope of Work- Filter Pack Replacement

- Replace filter packs/media as required (OEM or equivalent media). Used/soiled media will be containerized and characterized for disposal.

Scope of Work- Waste Handling, Characterization & Disposal

- Field screening (visual, odor, PID if available) and lab analysis on representative samples to determine if waste is **hazardous** or **non-hazardous used oil / solid waste**. ADEM requires used oil sent for disposal to be evaluated for hazardous characteristics. ADEM+1
- Generate chain-of-custody and lab reports. If waste is hazardous, handle per Alabama hazardous waste regulations and manifesting rules; if non-hazardous but not recyclable, handle per ADEM used oil/solid waste disposal standards. Legal Information Institute+1
- The airport will need documentation of disposal and receipt of disposal.
- Provide required manifests (EPA Uniform Hazardous Waste Manifest or transporter documentation) and submit copies to ADEM when required. ADEM
- Document final legal off airport disposition: facility name, EPA ID (if applicable), dates, quantities, and transporters. Provide receipts and disposal certificates.
